PROTONPEN by pHformula

pHformula professional skin resurfacing treatment protocols
PROTONPEN by pHformula

PRODUCT DESCRIPTION

The PROTONPEN is intended to stimulate collagen induction in the skin. This will assist with:

- the absorption of active ingredients.
- skin tightening.
- lifting and rejuvenating.
- acne scars.
- promoting wound healing.
- improving wrinkles and fine lines.
- minimising pore size.
- improving the appearance of stretch marks.

PROTONPEN DEVICE BENEFITS

- Synergistic action with skin resurfacing solutions.
- Wireless and rechargeable.
- Light weight and ergonomic.
- Customised needle depth setting for optimum results.

Needling creates microscopic punctures intended to stimulate the skin's natural collagen (CIT) and elastin production. It triggers a healing response from the body, helping to rejuvenate the skin whilst preserving epidermal integrity. The aim of the pHformula PROTONPEN is the synergistic action of releasing chemical mediators for restructuring and regeneration of the skin. PROTONPEN can be used with nanoneedles or microneedles according to the skin needs.

PROTON RELEASE AND NANO-NEEDLING

Nanoneedles are used in the protocols with our skin resurfacing solutions and powerclays™. Nanoneedles

can be used with resurfacing solutions to deliver an innovative, non invasive transdermal delivery system designed to resurface and to rejuvenate the skin for optimum results in skin concerns such as:

- lack of tone.
- uneven texture.
- excessive pigmentation.
- scarring.
- loss of elasticity.

This is a controlled skin resurfacing approach, which is safe to use on all skin types and different skin disorders, such as **hyperpigmentation**, **acne**, **ageing** and **sensitive skin**. The silicone hair-like cones make it ideal to work on delicate areas such as the contours of the eyes and lips.

Due to the increase in absorption of the active ingredients, layer dependent and time dependent product application should be altered according to the skin's response.

PROTONPEN NANO-NEEDLING BENEFITS

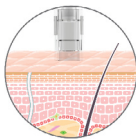

- Synergistic proton release action in the skin.
 - Both our PROTONPEN and resurfacing products are working in a synergistic action.
 - Cytokines are activated followed by the PROTONPEN that induce the same action as our skin resurfacing products.
 - Therefore, they not only work in synergy, but boost each other's results.
- Neo-collagen production.
- Instant glow.
- Increased nutrient release.
- Controlled nano resurfacing.
- Improves uneven skin tone and texture.
- Optimum treatment results with no downtime.

NANONEEDLES

 <p>Treats the upper 0.15mm of the epidermis.</p>	 <p>Silicone hair-like cones that separate the cells within the very top layer of the epidermis to allow enhanced penetration of active products. By creating these micro channels, product absorption is increased by 97%. The skin is encouraged to rejuvenate itself.</p>	 <p>The benefits of this skin resurfacing infusion treatment, includes:</p> <ul style="list-style-type: none"> • pigmentation reduction • increased cell turnover • skin rejuvenation • immediate glow • no downtime

TRANS DERMAL SOLUTIONS AND MICRO-NEEDLING TREATMENT

Trans dermal solutions by pHformula are sterile solutions formulated to activate cellular metabolism, for an intensive revitalization, hydration, and rejuvenation. PROTONPEN and microneedles (collagen induction therapy) are used in the protocols with our trans dermal solutions working synergistically to stimulate the body's natural healing process, increasing collagen and elastin production to promote skin rejuvenation and increase absorption of products through the skin.

This procedure can also be effective for:

- Skin laxity or sagging.
- Thinning skin.
- Fine lines and wrinkles.
- UV damage.
- Hyperpigmentation.
- Acne.
- Enlarged pores.
- Scars and stretch marks.

Micro-needling treatment triggers a healing response from the body helping to rejuvenate the skin whilst preserving epidermal integrity. It is safe to use on

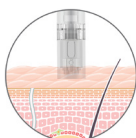

all skin types and different skin disorders, such as **hyperpigmentation, acne, ageing and sensitive skin.**

PROTONPEN MICRO-NEEDLING BENEFITS

- Boosts collagen and elastin.
- Promotes skin rejuvenation.
- Improves overall texture and pigmentation.
- Reduces the appearance of fine lines and wrinkles.
- Improves the appearance of acne scars, deep scars and stretch marks.
- Reduces enlarged pores.
- Increases absorption of products through the skin.

MICRONEEDLES

 <p>Can be adjusted to different depths, from the epidermis to the dermis.</p>	 <p>Stimulates the body's natural healing process, increasing collagen and elastin production to promote skin rejuvenation and increase absorption of products through the skin.</p>	 <p>Effective for:</p> <ul style="list-style-type: none"> • skin laxity or sagging • thinning skin • wrinkles • UV damage • hyperpigmentation • acne scars • stretch marks
